

Declaration to be filled by the Producer/Supplier of Deinking Chemical

PRODUCT NAME	
FUNCTION	
AREA OF APPLICATION	
PRODUCER/SUPPLIER	

I/we declare that the chemical contains the following substances of very high concern (SVHC) according to the candidate list¹ at the date of application:

Name and CAS-number of SVHC	Content, % w/w

I/we declare that alkyl phenol ethoxylates or other alkyl phenol derivatives have not been added to the deinking chemical. ²		YES <input type="checkbox"/>	NO <input type="checkbox"/>
Surfactants based on silicone derivatives need not to be biodegradable if the paper sludge from the de-inking process is incinerated.			
I/we declare that all other surfactants present in de-inking chemicals are readily or inherently biodegradable. ³		YES <input type="checkbox"/>	NO <input type="checkbox"/>
Name and CAS of surfactant used in de-inking	Is surfactant based on silicone derivatives?	Readily/inherently biodegradable	Test method

¹ The list of substances identified as SVHC and included in the candidate list in accordance with Article 59(1) of Regulation (EC) No 1907/2006 can be found here:

http://echa.europa.eu/chem_data/authorisation_process/candidate_list_table_en.asp.

² Alkylphenol derivatives are defined as substances that upon degradation produce alkylphenols.

³ For ready biodegradability: OECD No 301 A-F (or equivalent ISO standards) with a percentage degradation (including absorption) within 28 days of at least 70 % for 301 A and E, and of at least 60 % for 301 B, C, D and F.

- For inherent ultimate biodegradability: OECD 302 A-C (or equivalent ISO standards), with a percentage degradation (including adsorption) within 28 days of at least 70 % for 302 A and B, and of at least 60 % for 302 C.
