

22 December 2014

EU Ecolabel Competent Body in Finland can declare the following:

The pulp production and the emission measurements of UPM Kymi pulp mill have been assessed by the CB Finland against the EU Ecolabel criteria for tissue paper.

We confirm that the pulp produced by UPM Kymi pulp mill fulfils the requirements for the pulp production laid down in the Commission Decision 2009/568/EC of 9 July 2009 establishing ecological criteria for the award of the EU Ecolabel to tissue paper.

The pulp produced by UPM Kymi pulp mill is approved to be used in the production of EU Ecolabelled tissue paper.

This document can be used as evidence for compliance of the EU Ecolabel requirements on the pulp production process.

Please note that UPM Kymi pulp mill is responsible to deliver necessary information of

- mill's emissions to air and water
- energy use and
- amount of certified fibres

to its customers, who produce EU Ecolabelled papers, so that they can do the calculations required from them.
